Dear Sir,

re Proposed New town at Stretford

I am very concerned with the impact on the environment of a new town of 5500 dwellings in the Stretford area. This area is an area of outstanding natural beauty and an important buffer between Plymouth and the historic town of Plympton.

Whereas it may already be too late to prevent any development being started it is still too late to protect the surrounding townships. Plympton St Maurice in particular is an architectural gem being an ancient town protected by a conservation area status. To expose the area to an increased traffic density and population density would be disastrous for this ancient village.

I would urge that in your considerations full weight be given to divert any traffic from the St Maurice area and that as much buffer space as

possible be given between Plogston and the new  
development.

Yours faithfully,
