| Current/Shared Issues | <p>One Planet Dartmoor Work is progressing on the One Planet Dartmoor project and it is hoped that a report and action plan will be brought forward at the next Partnership meeting. The One Planet Dartmoor initiative was launched in October 2009 as part of a Low Carbon Festival. The aim of the initiative is to look at how we can live within environmental limits – One Planet – but accepting that Dartmoor is not a closed system.</p> <p>It is a partnership project – an initiative that encourages everyone involved with Dartmoor (businesses, farmers, foresters, local communities and visitors) to live within their fair share of the earth's resources. We are working closely with the Dartmoor Circle community network who are developing a Low Carbon Plan for Dartmoor.</p> <p>Search for Mountain Bikers and Horse Riders to develop a new leaflet Mountain bike and horse riding groups who use Dartmoor are being called upon to help develop a new leaflet.</p> <p>While families with younger children and the older generations are well catered for by National Parks, there is not so much information aimed at 16 to 25 year olds. A leaflet is being produced to provide guidance, top tips and exciting one to two hour routes for new users and anyone looking for short but intense rides.</p> <p>The leaflet is being developed by The Mosaic project (run by the Campaign for National Parks) in Partnership with Dartmoor National Park Authority. Mosaic has two main aims. The first is to encourage younger people and ethnic minorities to access the moors and to make more use of National Parks. The second is to help National Park Authorities improve their services to cater for these groups. Any mountain bike and horse riding groups who would like to become involved will receive recognition for their involvement.</p> |
| SHSP Action Recommended | Each Partner to consider what actions they are taking or considering taking that will contribute to achieving One Planet Dartmoor. |
