

## **REPORT**

To the Salcombe Harbour Board.

As the independent designated person appointed by the Salcombe Harbour Board, we report on the Safety Management System, Number 6, updated on 12th December 2008 and we have reviewed compliance during the past year.

We have revised the document in line with the 2009 issue of the Port Marine Safety Code.

In our opinion there is in place a safety management system which - if maintained actively - complies with the requirements of the Port Marine Safety Code and enables the Salcombe Harbour Board to set out their safety policies, their organisation which can put them into practice and their procedures for a planned and systematic approach to policy implementation.
